7.1.3 Waste Management Report

Pollution from waste is unpleasant and results in large amount of litters. Waste may cause several health problems that can be categorized as biodegradable, non biodegradable and hazard waste. Biodegradable waste includes food waste, waste from toilets etc. Non-biodegradable waste includes plastic, glass, bottles etc. and hazard waste is cleaning chemical and laboratory chemical products.

Each and every department of the college creates some waste and dumps in dust bins available in the department. The biodegradable wastes are converted to fertilizer by composting inside the campus. Liquid waste generated from laboratories is Sewage waste and laboratory effluent types.

E-waste generated from computer lab, academic and administrative offices includes lab instruments, desktop, laptop, UPS, sound system, wifi devices, network cable etc. These wastes are put to optimal use and they are stored in a place for disposal.

Notebooks and papers used for different purposes are sent for recycling. Every bit of paper is utilized to save trees by all the departments for academic and office work. Non degradable waste are also collected and are disposed to the Gram-panchayat. Sweepers are allotted to each room, to manage all the waste generated at the college campus. Waste audit is done during the year.
